XRP Chess

Play in Xaman

A peer-to-peer xApp for the Xaman wallet

XRP Chess

Peer-to-peer chess with real XRP stakes.
Winner takes 90%.

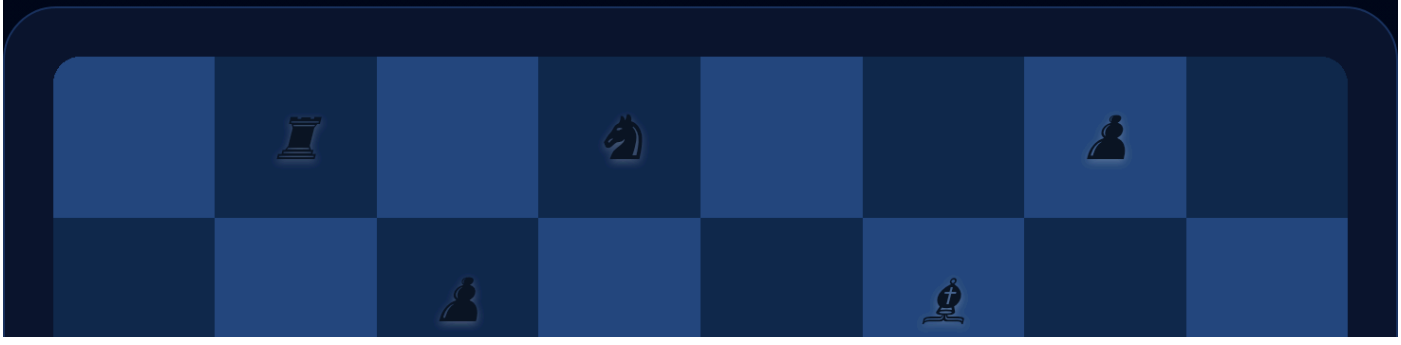

Play in Xaman

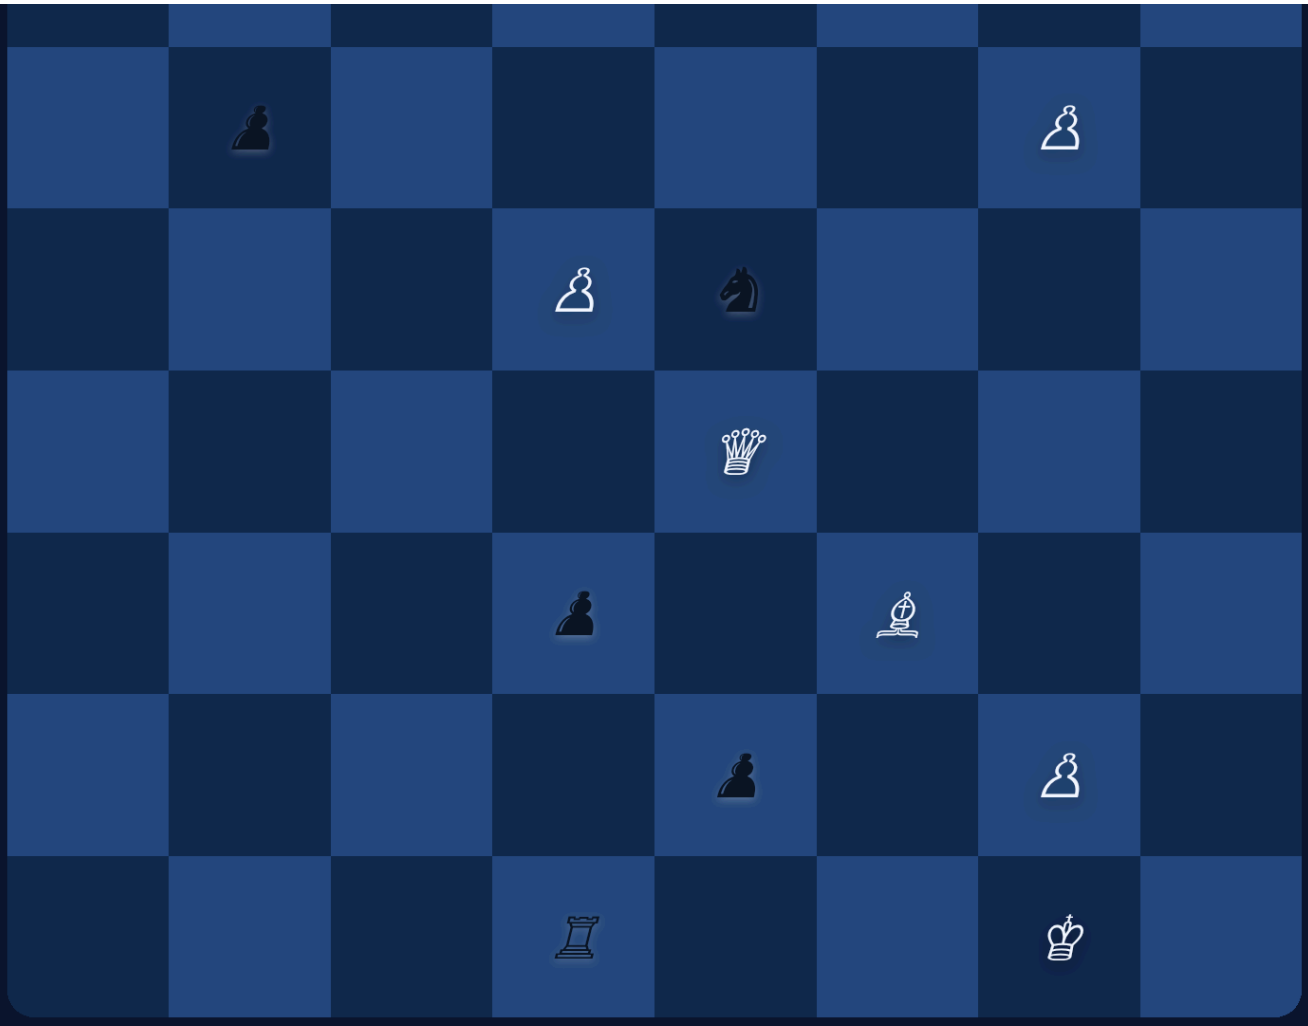

How it works

3 levels
5 – 100 XRP stakes

90%
Of the loser's stake to the winner

On-ledger
Automatic payouts on the XRPL

Master level · 100 XRP stake

Sample position

How it works

From wallet to checkmate in four steps. No accounts to create — both stakes are held in escrow by the operator for the duration of the game, then paid out on the XRP Ledger under the rules below.

STEP 1

Connect your Xaman wallet

Open XRP Chess inside Xaman and sign in with your wallet. Your public XRP address is your identity — nothing else is needed.

STEP 2

Pick a level and stake

Choose Beginners, Professional, or Master. Each level has a fixed stake and clock, so every match is fair before it starts.

STEP 3

Both players escrow equal XRP

You and your opponent each escrow the same amount of XRP. The game only begins once both stakes are locked in.

STEP 4

Play — winner is paid automatically

Play your game. When it ends, the payout is settled automatically on the XRP Ledger — no claim forms and no waiting on a manual payout.

Three levels, one board

Every level is winner-takes-90%. Pick the stake that matches your confidence.

CASUAL

Beginners

5 XRP

stake per player

Clock	15 min + 10s
Win pays	9.5 XRP
Draw refunds	4.75 XRP

MOST PLAYED

Professional

25 XRP

stake per player

Clock	10 min + 5s
Win pays	47.5 XRP
Draw refunds	23.75 XRP

HIGH STAKES

Master

100 XRP

stake per player

Clock	5 min + 3s
Win pays	190 XRP
Draw refunds	95 XRP

Payout rules

The math is fixed before the first move and settled on-ledger the moment the game ends. No hidden fees beyond what's stated here.

Win

You get **your full stake back plus 90% of your opponent's stake**. The remaining 10% of the loser's stake is the operator fee that keeps XRP Chess running.

Draw

An agreed draw or stalemate refunds **95% of each player's stake**. The remaining 5% from each player goes to the operator.

Abandoning a game

Leaving or disconnecting from a game in progress is a **forfeit — it counts as a loss**. Your opponent is paid as the winner, under the win rules above.

Both players abandon

If a game is abandoned by both players, **2.5% of each stake goes to the operator** and the remaining 97.5% is returned to each player.

Terms of Service

The short version, in plain language. By playing XRP Chess you agree to the following.

Who can play

You must be at least 18 years old to play XRP Chess. XRP Chess is a game of skill — outcomes are decided by the players' chess play, not by chance.

Know your local laws

Playing games for money or cryptocurrency stakes is restricted or prohibited in some places. You are responsible for making sure that playing XRP Chess is legal where you live, and you must comply with your local laws at all times. If it isn't legal where you are, don't play.

How stakes are held

Stakes are held in custodial escrow by the operator for the duration of a game and are paid out according to the payout rules published on this page. Payouts are final once settled on the XRP Ledger.

Play at your own risk

- You can lose your stake. Only play with XRP you can afford to

lose.

- Abandoning a game — including losing your connection — counts as a forfeit loss.
- Cryptocurrency prices move. The operator is not responsible for changes in the value of XRP.
- The service is provided "as is", without warranties of any kind.

Questions about these terms: Quesitc@gmail.com

Privacy Policy

XRP Chess is built to need as little information about you as possible.

No accounts

There are no usernames, passwords, or sign-up forms. You connect with your Xaman wallet, and the only identifier we use is your **public XRP wallet address** — the same address anyone can already see on the public XRP Ledger.

What we keep

- Your public wallet address, used to match you with opponents and send payouts.
- Game records — moves, results, and payout transactions —

kept so payouts can be verified and disputes resolved.

- Anything you send us if you email support.

What we never collect

We never ask for, see, or store your wallet seed phrase, secret keys, or Xaman credentials. Transactions on the XRP Ledger are public by design; anyone can view them on a ledger explorer.

Your data requests

To ask what records we hold about your wallet address, or to request their deletion where the law allows, email Quesitc@gmail.com from the address you'd like us to answer.
